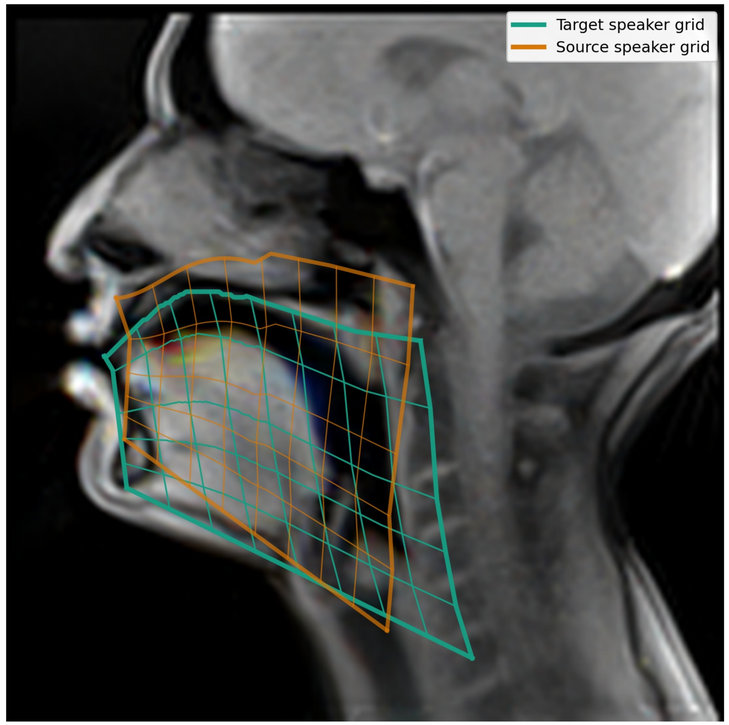
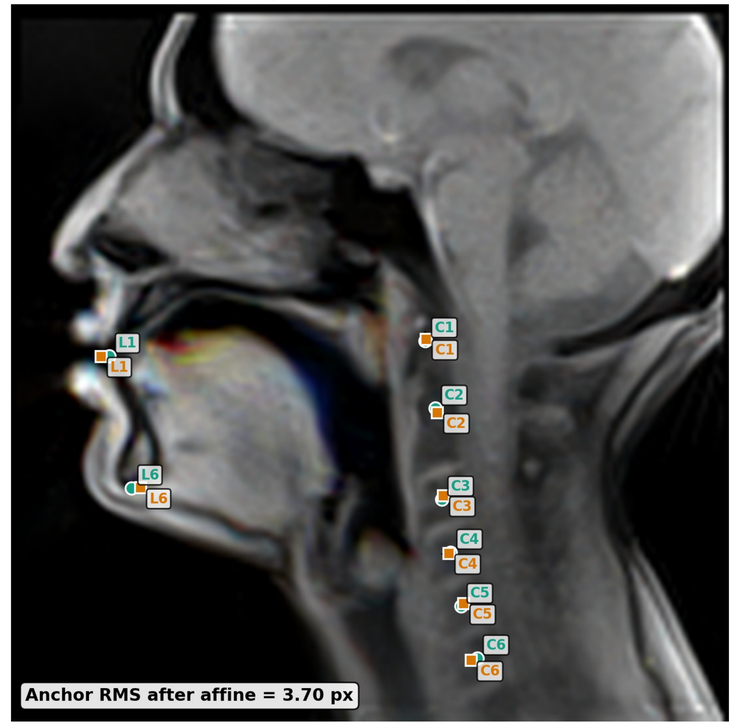
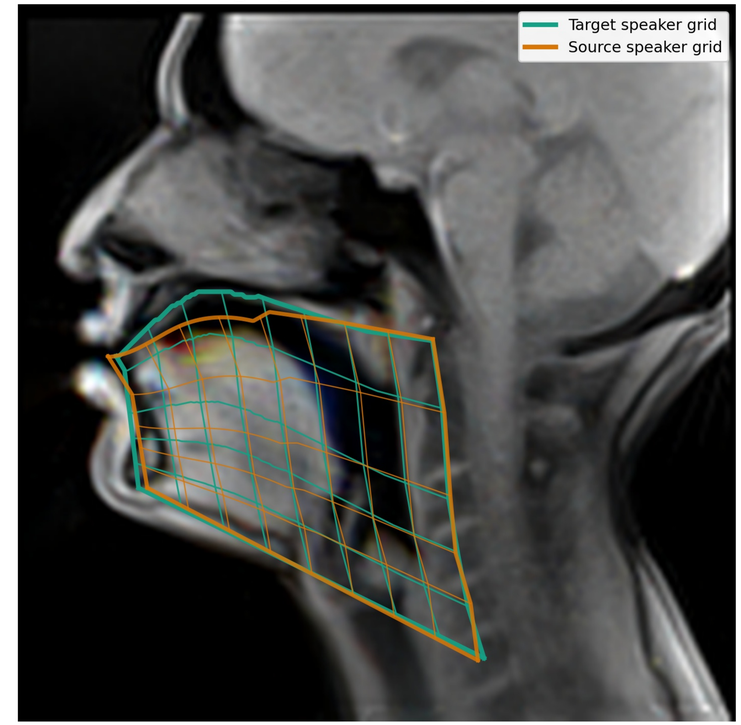
Step 0: before alignment



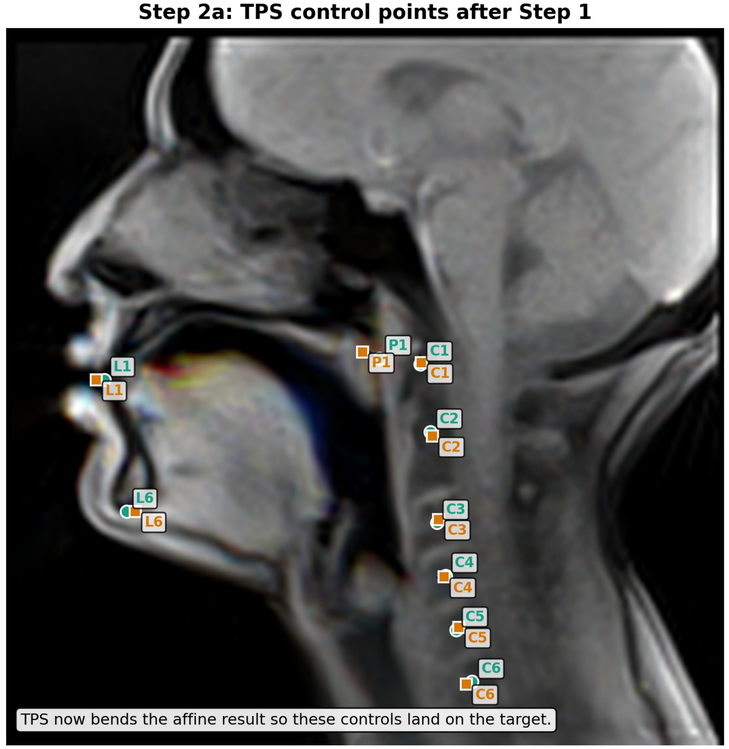
Step 1a: affine fit on 8 anchors (C1..C6 + L1 + L6)



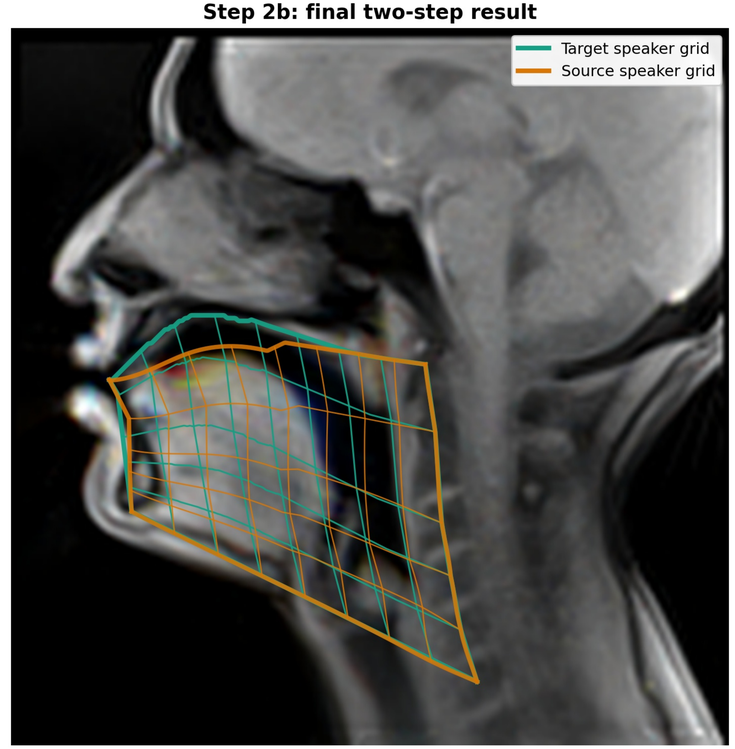
Step 1b: target grid + affine-mapped source grid



Step 2a: TPS control points after Step 1



Step 2b: final two-step result



Method 4 summary

Step 1 anchor RMS: 3.70 px
Final spine RMS: 0.00 px
Final L1 error: 0.00 px
Final L6 error: 0.00 px
Final P1 error: 0.00 px
Final L 2-pt RMS: 0.00 px

Reading order:
1. overlay both original grids
2. fit affine on 8 anchors
3. inspect affine grid result
4. use TPS control points after Step 1
5. inspect the final two-step grid overlay
